Hidden Champion in medical technology – something we are proud of

Leading medical technology companies worldwide rely on our 3D tracking technology – we have been the global market leader in this field for over 25 years. Our expertise as an innovative high-tech company for the realization of modern, digital solutions in medical application fields is a central component of our success.

INSIDE

People work for NDI at four locations worldwide. The cultural diversity in our globally active company and the demands of the high-tech medical industry make for a stimulating work environment. The knowledge, enthusiasm and experience of our employees are essential to our success. And everyone knows everyone by name – including our colleagues in Canada, the USA and Hong Kong. We trust each other, are honest with each other and can celebrate with each other. And we do it across hierarchies – that's what makes work fun!

Immerse yourself in the world of manufacturing engineering and use your technical expertise in areas such as first-level support and software development. We look forward to receiving your application!

TASKS

- You support production by providing first level support for all questions and problems of our production employees and / or suppliers. You will also analyze technical errors in returns
- Another task is the calibration of measuring equipment and the performance of annual ESD tests
- In the field of manufacturing engineering, you will be involved in the collaboration and development of application software (Phyton)
- You develop and maintain test stations independently, including validation and verification
- If production resources are missing, you actively participate in the acquisition and assembly - for our own production and / or for external production

PROFILE

- You have completed technical training as an electronics technician for devices and systems or a degree as a technician in electrical engineering / automation technology
- 3 years of professional experience in the manufacturing industry or in the test field is an advantage
- experience in test equipment construction and programming are nice to have
- You are very familiar with the ISO 13485 and / or 9001 standards
- ESD, IPC, JEDEC and Poka Yoke are terms and abbreviations that are not unfamiliar to you, just like the programming languages Python or C++
- You have a good technical understanding, and your working style can be described as independent, organized and reliable. You have a very good command of German and English
