Innovation in therapy and diagnosis - that is what we are committed to.

Leading medical technology companies worldwide rely on our 3D tracking technology – we have been the global market leader in this field for over 20 years. Our expertise as an innovative high-tech company for the realization of modern, digital solutions in medical application fields is a central component of our success.

People work for NDI at four locations worldwide. The cultural diversity in our globally active company and the demands of the high-tech medical industry make for a stimulating work environment. The knowledge, enthusiasm and experience of our employees are essential to our success. And everyone knows everyone by name – including our colleagues in Canada, the USA and Hong Kong. We trust each other, are honest with each other and can celebrate with each other. And we do it across hierarchies – that's what makes work fun!

As the owner of this position, you will be responsible for the technical coordination and integration of the work results of various disciplines in the development projects. In concrete terms this means:

- · Being the technical contact person for the overall project for our customers and our product management
- · Coordinating the development projects both internally and with our key customers
- · Communicating and presenting project status
- Coordinating, organizing and implementing milestones and deadlines with customers

- Experience in project management and interdisciplinary knowledge of hardware software mechanics is an advantage
- · Experience in medical technology (ISO 13485, FDA, MDD/MDR) is nice to have
- · Fluent English is required
- · Willingness to travel 10-20% of your working hours to customers in the USA, Canada, but also globally
- · Cooperative and empathetic working style make your work easier
